DEPARTMENT OF APPLIED ART

Vision

The course is designed to make undergraduate students industry-ready by teaching Advertising design methods, Design Techniques, and Principles of design for ad agencies, and the Software industry.

Mission

- Preparing individuals for leadership and professional careers in the areas of Design.
- The committed to evolving design through research and creativity.
- To explore industrial experience and concerted learning.
- Indoctrinate global presence of the University and global outlook in the students.
- To build and strong relationship with private organizations.

Program Educational Objectives (PEOs)

PEO 1:To provide an in-depth understanding of the design fundamentals

PEO 2To establish a strong design foundation for students

PEO 3:To identify their ideas and creativity and focus on their practice.

PEO 4:To update their strengths of designs and the latest market trends following the latest technology.

ESTD2020

Programme Outcomes (PO's)

- 1. Technical knowledge: Building a solid foundation in the elements, principles and process of visual design.
- **2. Communication:** communicate effectively with clients and utilize the talents and strengths of design colleagues to develop the best design products.
- **3. Design solutions:** Applying fundamentals to solve increasingly complex design problems in technologically innovative ways.
- 4. Design and Research: Engage in critical analysis of their own and their peer's creative work. Explore types of Fonts, communication and dissemination techniques to entertain via written, oral and visual media.
- **5.** Modern tool usage: An ability to use the techniques, skills, and modern technology tools necessary for designers.

- **6. Design Principles:** Design Principles help for your career with decision making. A few simple principles will guide your appropriate decisions.
- **7. Visual Communication:** Understanding of and ability develop strategies for planning, producing, and disseminating visual communications.
- **8.** Marketing: Applied Art aim at making the students to achieve Commercial and market oriented Art which will beneficial for them in future.
- **9. Creative Thinking:** Engage in the practicing of ethical professionalism in the creative thinking of the world.
- 10. Critical Thinking: Students will communicate their ideas and emotions in creative ways. Students will use their critical thinking skills and problem solving strategies for overall professional growth.
- **11. Ability to design solutions:** For the development of current society and a design which is functional in the growth of acting society.
- **12. Expertise:** Students will be expert in the specific domain of design, and work in design related advertising companies.

Correlation between the POs and the PEOs

| DEOr | | Programme Outcomes | | | | | | | | | | |

MODULE - I

The History of Typography A brief timeline of the history of typography and printing. Where did letter forms come from? How have they evolved through time? How does history and technology affect the way letter forms are used and how they look? What is Micro Typography? What is the role of typography within Graphic Design?

MODULE - II

The Anatomy of Type What is a serif? What is sans serif? What is a stem? stroke? loop? bowl? ball terminal? We will explore the differences between both forms of type and all their idiosyncrasies plus discuss why choosing the right typeface is necessary for good communication.

Explore the Helvetica Font family.

MODULE - III

Optical Spacing: Kerning, Tracking, Leading & Point Size What is kerning? What is leading? What is point size? We go over these details and use InDesign to explore how amounts of space between letters, between lines, the size of letters and position can affect the content of a body of text.

MODULE - IV

Sans Serif I Part one of the slide show and lecture on the history of sans serif typefaces covering Akzidenz Grotesk, Gill Sans, Erbar, Kabel, and Futura. Type Foundries and Licensing What is a type foundry? Are your usage rights for personal or commercial application? Are free fonts really free? How do generalist design firms and agencies license fonts for commercial use?

MODULE - I

Introduction to elements of sculpture (line, form & space, texture, volume, and colour) and principles of Sculpture (Proportion, balance, rhythm, harmony, emphasis) and types of dimensions with visual references.

MODULE - II

Introduction to geometrical shapes with proper measuring values and develop the sense of the threedimensional quality of cube, prism, sphere, cylinder, etc. and group composition by following sculptural principles using buff board or sheet / ivory sheet / clay / wood.

MODULE - III

Study of natural (fruits, vegetables, shells) and man-made (objects using in daily life) things to develop the sense of three dimensional quality in various objects and contour, volume, texture of materials and create a composition by following sculptural principles using clay.

MODULE - IV

Study of humanbody parts like eyes, nose, ears and mouth etc. in clay modelling.

| CO5 | | Overcome weaknesses in some essential professional skills – only for thos who needit (e.g. Mathematics, Language proficiency modules) | | | | | | | NA | NA |
| CO6 | Become familiar with the ethos and culture of the institution (based or institutionalculture and practices) | | | | | | | based on | NA | NA |

The various modules or core areas recommended for the 3-week SIP are:

SIP Module 1: Universal Human Values I (UHV I) 22 hours

The purpose is to help develop a holistic perspective about life. A self-reflective methodology of teaching is adopted. It opens the space for the student to explore his/her role (value) in all aspects of living - as an individual, as a member of a family, as a part of the society and as an unit in nature. Through this process of self-exploration, students are able to discover the values intrinsic in them. The session wise topics are given below:

| Session No | Topic Title | Aspirations and Issues | Basic Realities | |
|-------------|---------------------------|---|--------------------------------|--------|
| | - | - | (underlying harmony) | |
| 1 | Welcome and | Getting to know each other | Self-exploration | |
| | Introductions | C | 1 | |
| 2 and 3 | Aspirations | Individual academic, career | Basic human aspirations | |
| | and | Expectations of family, peers, | Need for a holistic | |
| | Concerns | society, nation | perspective | |
| | Concerns | Fixing one's goals | Role of UHV | |
| 4 and 5 | Self- | Self-confidence, peer pressure, | Harmony in the human | |
| i una c | Management | time management, anger, | being | |
| | management | stress Personality development, | being | |
| | | self-improvement | | |

SIP Module 5: Lectures by Eminent People

Listening to the life and times of eminent people from various fields like academics, industry etc. about careers, art, self-management and so on enriches the student's perspective and provides a holistic learning experience.

SIP Module 6: Proficiency Modules

This module is to help fill the gaps in basic competency required for further inputs to be absorbed. It includes effort to make student proficient in interpersonal communication and expression as well as awareness about linguistic and there after NLP.

SIP Module 7: Literature / Literary Activities

Through the exposure of local, national and international literature, this module is aimed at helping the student learn about traditional as well as contemporary values and thought.

SIP Module 8: Creative Practices

This module is to help develop the clarity of humanistic culture and its creative, joyful expression through practice of art forms like dance, drama, music, painting, pottery, sculpture etc.

SIP Module 9: Extra Curricular Activities

This is a category under which things that are not placed in any of the above may beplaced. Some clubs and hobby group may be made for each of the above categories, so that students may pursue them even after SIP.

The recommended hours to be allocated are given above. Depending on the available faculty,staff, infrastructure, playgrounds, class timings, hostellers and day scholars etc., the timetablefor these activities may be drawn up. Of course, colleges may conduct an inaugural functionat the beginning of the SIP; and they may also conduct a celebratory closing ceremony at theend of the SIP.In particular during the lockdown phase, appropriate care may be taken and some or allactivities may be planned in distance-learning or on-line mode.

Implementation:

The institution is expected to conduct the 3-week SIP under the guidance of the Director/Principal or Dean Students or a senior faculty member. For this, the institution is expected to make an SIP Cell. The SIP Cell will be responsible for planning, and then implementation of the SIP.

Follow up:

The SIP is only the beginning of the interaction with newly joined students.

An important part of the SIP is to associate one faculty mentor to every small group of about 20 students; and also associate one senior student buddy to an even smaller groups of about 5 students for the guidance required for holistic development of the newly joined student throughout his/her time in the institution/college.

These activities are to be continued in the ongoing academic program along with other cultural activities through the Student Activity Cell (SAC).

TECTURE A

MODULE – I

Introduction to the layout, The grid system, Layout design principles, Alignment of the layout, Repetition. Monogram, Designing a Monogram, Symbol, Trademark, Functions of a Trademark, Types of a Trademark. Stationary & Literature: Letterhead, Specimens of Visiting card, Folder, Booklet, Brochure, Leaflet, Sticker, Designing a calendar.

ESTD2020

MODULE – II

PRESS LAYOUT DESIGNING

- 1. Study of Alignments (Left, Center, Right, Justified)
- 2. Rearrangement of Layout (Collage and contour drawings)
- 3. Layout of elements in gray scale.
- 4. Subjective Press Layout.

MODULE – III

POSTER DESIGNING:

- 1. Poster for Public Welfare like saving water, electricity etc.
- 2. Poster for Public Welfare like Postal Services, Railways, Bus Services.
- 3. Poster for Service Industry like Travel & Tours, LIC etc.
- 4. Poster for Service Industry like shopping malls, Paints etc.

MODULE – IV

Package Design:

Packaging design samples on variety of ideas and presentation techniques

Packaging design brief, a refinement of table of ideas or mind map in form of documents. Variety of thumb nail sketches with instructor support. How to form a paper model of a carton.

| COs Course Outcomes | | | | | | | | | POs | BTLs |
| | The student will be able | | | | | | | | | |
| CO1 | To understand the basics in Print making and learn the various techniques. | | | | | | | | | 2, 3, 5,6 |
| CO2 To create calligraphy works using various materials. | | | | | | | | 6,7 | 2, 3, 5,6 | |
| CO3 | CO3 To create monotype printing artworks. | | | | | | | | 6, 7 | 2, 3, 5,6 |
| CO4 | CO4 To create relief print works, brings the texture. | | | | | | | | 6,7 | 2, 3, 5,6 |

MODULE – I

Introduction to theory of Print Making: Introduction to the history of printing medium and techniques from the traditional process through to calligraphy and other Printmaking process.

MODULE – II

Calligraphy in Black & white: Study of a printmaking process in which a variety of (usually found) materials are arranged on a collage on to affirm matrix like cardboard or wood. this process are extremely basic and uncomplicated. A calligraphy refers to a collage of materials glued on to a "printing block," which is a square of cardboard for base, when the base is prepared with help of glue and the raw material replaced on baseboard is to be placed on surface & it is to dry, then with Paper is pressed on to the surface to produce a print, and about calligraphy prints

(For example, the found raw-materials-

- * Textured Handmade sheet, Gaze-cloth (Bandage cloth surgical),
- * Thread(cotton) medium thick, Jute cloth pieces, Embroidery lice cloth,
- * Sand Paper (Electro coated) as smooth-Rough grades, & any Flat surface materials etc...)

MODULE – III

Monotype printing image: Mono printing and monotype are very similar. The difference between mono printing and monotype printing is that mono printing has a matrix that can be reused, but not to produce an identical result. With monotyping there are no permanent marks on the matrix, and at most two impressions (copies) can be obtained.

MODULE – IV

Surface printing process: In this base medium is wood-block. The relief printing is a process where protruding surface faces of the printing block are inked; recessed areas are ink free. Printing the image is relatively simple matter of inking the surface of the block & bringing it in firm contact with the paper, and its print image.

| | The student will be able | | | | | | | | | |
| CO1 | To development and light theory with different backgrounds and seasons | | | | | | | | 6, 7 | 2, 3, 5,6 |
| CO2 To understand elementary knowledge of design and create 3D design | | | | | | | 6, 7 | 2, 3, 5,6 | | |
| CO3 To overlap motifs and colour using tertiary colours with tints and shades | | | | | | | 6, 7 | 2, 3, 5,6 | | |
| CO4 | CO4 To develop Visual mixing skills | | | | | | | | 6, 7 | 2, 3, 5,6 |
| | OTH DO | | | | | | | | | |

MODULE – I

Color experience (pigment and light theory) High key, middle key, and low key, high key tone with and low contrast. Chromatic expression on different backgrounds, depiction of seasons etc.

MODULE – II

Color experience-Color harmonies. Complementary, Split-complementary, Double Split- Complementary analogous and receding colors. Visual mixing, creative designs through simple motifs from nature and manmade objects,

MODULE – III

Elementary knowledge of design (golden rules of art) design based on the fundaments such as line, from color, texture, proportion and rhythm tonal values in 3 dimensions exercise with cube prism, sphere, cylinder etc. (E.g., Nature: Mountain. Clouds, Butterfly and flowers, fish & water plants, birds and animals etc.).

MODULE – IV

Overlapping of motifs & color combinations to be given from tertiary colors with tints and shades. E.g., For objects: distorted in given space (golden rules of art) exercises - nature and object combination to be given related to colors theory

MODULE – I

Communication: Importance of Communication; Elements of good individual communication; organizing oneself; different types of communication; Barriers in the path of Communication.

MODULE – II

Listening skills: Listening to conversation and speeches (Formal and Informal)Reading: Techniques of reading, skimming, Scanning, SQ3R technique

MODULE – III

Creative Writing: Scope of creative writing; Writing skills Signposting. Outlines, Rephrasing Writing a report/ format of the report; Paragraph, Letter Writing, Essay writing, Memo, Cikedlar, Notice Cover Letter, Resume, Writing with a thesis, Summary, Précis, Product description - Description of projects and features Oral Report; Periodical Report; Progress Report; Field Report Preparation of minutes; Video conference; Tele conference / Virtual meeting

MODULE – IV

Speaking: How to converse with people, How to communicate

effectively; Language and grammar skills; Pronunciation drills, Phonetics, vowels,

Diphthongs, consonants, Stress, Rhythm and intonation, Conversational skills Features of effective speech-

practice in speaking fluently-role play-telephone skills-etiquette.

MODULE – V

Short Extempore speeches-facing audience-paper presentation-getting over nervousness-Interview techniques-preparing for interviews - Mock interview.Body Language.

MODULE – VI

Impact of internet on communication; communication through computers; voice mail; broadcast messages; email auto response, etc.

| MODUI | LE – I | | | Ř | | P | Ĥ | | | |

Environmental studies–Introduction: - Definition, scope and importance, Measuring and defining environmental development indicators.

Environmental and Natural Resources: Renewable and non-renewable resources - Natural resources and associated problems - Forest resources - Use and over - exploitation, deforestation, case studies - Timber extraction, dams- benefits and problems.

MODULE – II

Basic Principles of Ecosystems Functioning: Concept of an ecosystem. -Structure and function of an ecosystem. - Producers, consumers and decomposers. - Energy flow in the ecosystem Ecological succession. - Food chains, food webs and ecological pyramids. Introduction, types, characteristic features, structure and function of the following ecosystem:

- a) Forest Ecosystem
- b) Grassland Ecosystem
- c) Desert Ecosystem

Aquatic Ecosystem (Ponds, Streams, Lakes, Rivers, Oceans, Eustuaries)

MODULE – III

Biodiversity and its conservation: Introduction – Definition- genetic, species and ecosystem diversity. Biogeographical classification of India

Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. - Endangered and endemic species of India.

Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity

MODULE – IV

Environmental Pollution: Definition, Cause, effects and control measures of

- a) Air pollution
- b) Water pollution

- c) Soil pollution
- d) Marine pollution
- e) Noise pollution
- f) Thermal pollution

Nuclear hazards

MODULE – V

Social Issues and the Environment: From unsustainable to sustainable development -Urban problems related to energy -Water conservation, rain water harvesting, and watershed management - Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case Studies. – Waste land reclamation

MODULE – VI

Human Population and the Environment: Population growth, variation among nations. Population explosion Role of information Technology in Environment and human health. - Case Studies.

Field work: Visit to a local area to document environmental assets River /forest grassland/hill/mountain - Visit to a local polluted site-Urban/Rural/industrial/ Agricultural Study of common plants, insects, birds. - Study of simple ecosystems- pond, river, hill slopes, etc.

MODULE – III

Logo Design Process

- Discover: Get to know the client's business.
- Research: Learn about the industry & competitors.
- Brainstorm: Develop ideas & decide on art direction.
- Sketch: Create logo concepts based on the strategy.
- Design: Select best logos & execute them digitally.
- Present: Show logo concepts & get client's approval.
- Delivery: Export logo files & create a style guide.

MODULE – IV

Design a Logo Using the Principles

- Tips and Tricks to Design a Perfect Logo
- Biggest 5 Logo Design Mistakes To Avoid
- Typographic chaos
- Too Complex, too abstract
- Using raster images
- Being a Copy Cat
- Listen to the Client's Needs

Logo Design Inspirations

MODULE - I

Introduction to Dangler design, provide you vibrant and artistic hanging danglers of different variety with custom shape and sizes. Danglers are effective and eye-catching to convey the complete messages to the customer. At the same time it takes less space and functions as a good marketing item.

MODULE - II

Students will need to demonstrate how the design process itself results in a variety of possible design solutions. It is not necessary for candidates to produce full-scale models, but they should be aware of the possible constraints that might occur during the manufacturing process

MODULE - III

Students should demonstrate an expressive and/or interpretative artistic response to the visual world. They should show an understanding of the conventions of Dangler designs and frame design of the shapes.

MODULE - IV

Design process: conceptualization, stages involved types of design creativity in design, traditional and modern designs – technology in designing.

Conceptualization and Ideation of Dangler's, Translation of ideas into campaigns, Visualization Designing & layout, copy writing- types of headlines, body copy base lines, slogans, logos & trade marks,

MODULE - I

Graphic design basics

To better understand the meaning of graphic design, it is important to be aware of the elements and principles that make up design. Elements are used in conjunction or opposition with each other to create visually striking and impactful designs.

510

A

These graphic design elements include:

- Colour
- Form
- Line
- Shape
- Size
- Space
- Texture

MODULE - II

Graphic designers also adhere to the principles of design, which are essentially a set of guidelines that help a design achieve effective composition. These basic principles aid in creating balance and stability for the piece of work.

These graphic design principles include:

- Balance
- Contrast
- Emphasis
- Movement
- Proportion
- Rhythm

MODULE - III

Some of the most notable modern-day graphic design examples stem from advancements in technology. Here's a glimpse of some of these types of graphic design:

- Website design involves creating engaging and intuitive web pages for users. This includes overall layout, color scheme and navigation.
- **Motion graphics design**—or animation—brings visual elements to life through special effects, TV shows, video games and movies.

MODULE - IV

Types of graphic design

- Product design
- Branding design.
- Website design.
- Print design.
- Publishing design.
- Environmental design.
- Animation design

MODULE - I

Will cover the basics of Adobe Photoshop, ensuring that each student has the minimum level of prior knowledge. The initial lesson is structured so that students are all at the same level and ready to begin. It also offers a slow transition into the real content. Allow student the rest of the hour to navigate Adobe Photoshop to get used to the layout and to look over the printouts to familiarize themselves with the lessons ahead.

MODULE - II

Will cover the Selection, Crop and Slice Tools. This includes the Marquee Tools, Move Tool, Lasso Tools, Magic Wand, Crop, and Slice. Have them use Adobe Photoshop and follow along with lesson 2. Ensure they are using the correct raw images as requested by the lesson plan. Continually monitor progress and assist in troubleshooting students that have difficulties.

MODULE - III

Will cover the Retouch and Paint Tools. This includes the Healing Tools, Brush, Clone, History, Eraser, Fill Tools, Sharpen/Blur, Dodge/Burn, and Sponge. Have them use Adobe Photoshop and follow along with lesson 2. Ensure they are using the correct raw images as requested by the lesson plan. Continually monitor progress and assist in troubleshooting students that have difficulties.

MODULE - IV

Will cover the Drawing and Type Tools. These are used for vector based drawing and type. Have them use Adobe Photoshop and follow along with lesson 2. Ensure they are using the correct raw images as requested by the lesson plan. Continually monitor progress and assist in troubleshooting students that have difficulties.

Basic Image Manipulation, Colour Basics, Painting Tools, Brush Settings, Layers, Making Selections.

Module- I:

Introduction to Innovation: Meaning of Innovation, Difference between innovation and invention, Difference between Innovation and Creativity, Need to be Creative, Importance of Innovation, Innovation as a Competitive Advantage, Innovation Continuum, Innovation Cycle, Breakthrough innovations and its consequences on the society, Challenges in Innovation.

Module- II:

Creative Thinking: Types of Creative Thinking, Creative Thinking Process, Components of Creativity, Characteristics of a Creative Mindset, New product ideas, Idea generation methods, Principles of Idea Generation, Killing the ideas through Stage Gate Models. Intellectual Property Rights, Importance of IPR, Role of WIPO, Case Studies on Patents and Infringement of Rights.

Module- III:

Design Thinking & Liberal Art: Concept of Design Thinking, Stages of Design Thinking, Difference between Convergent Thinking and Divergent Thinking. Definition of Liberal Art and its Importance of Liberal Art, Role of Art and Culture to Innovate Business.

Module- IV:

Emerging Technologies: Meaning of Internet of Things, Components of IoT, Benefits of IoT, examples of

IoT enabled Innovations, Impact of IoT on Business, Future of IoT. Case Study on IoT. Innovation Leadership & Network: - Leadership, Skills and Characteristics of an Innovation Leadership, Meaning of Innovation Network, Significant of Innovation Network

Module– V:

Building Startup: Kelly Johnsons KISS Principle, Road map for building a start-up, crowd funding, advantages of crowd funding. Pricing strategies. Determining factors for Monetizing Innovation, Process of Monetization, reasons for failure of Monetization of Innovation, fixing the price of an Innovative Project. Detailed study on market potential.

Module – VI:

Startup Funding & Branding: Sources of funding: Bootstrapping, Angel Investors, Venture capitalists, Schemes of Government through Startup India, role of Institutional support and Commercial Banks. Introduction to branding a startup and developing branding strategies.

The Books:

1. The Design Thinking

Playbook: Mindful Digital Transformation of Teams, Products, Services, Businesses and

Ecosystems.

| | The student will be able | | | | | | | | | |
| CO1 | Students will learn Coral Draw Tool Learning | | | | | | | | 6, 7 | 2, 3, 5, 6 |
| CO2 | Students learn graphic design skills to create work that considers the entire user experience, including users' visual processing abilities. | | | | | | | | 6, 7 | 2, 3, 5, 6 |
| CO3 |)3 design with coral draw software, graphic design still revolves around age-old principles. | | | | | | | | 6, 7 | 2, 3, 5, 6 |
| CO4 | They will carefully monitor how their works' aesthetics match their users' expectations. | | | | | | | sers' | 6, 7 | 2, 3, 5, 6 |

MODULE - I

Getting to know the workspace and fonts/Creating a simple report cover

Students will familiarize themselves with the basics of Corel Draw, such as creating and saving documents, using fonts, resizing, rotating and moving documents and getting help. They will then create a report cover that contains a page border, an image from a symbol font, a title in artistic text and paragraph text. Suggested topics for discussion include legal issues surrounding font usage, design issues and the safety of downloading "free fonts" from the Internet.

MODULE - II

Using the toolbox/Using color

Students will learn to identify tools in the toolbox and use several common tools to create a half-page flyer for a party invitation. They will learn about color usage and discover several ways to apply color to an object and/or its outline. Suggested topics for discussion include reflective vs. direct color and how this relates to RGB and CMYK colors and screen vs. printed colors.

MODULE - III

Drawing and editing objects/Creating a greeting card

Students will learn the basics of using vector graphics and node editing for graphics and text, while creating a side-fold greeting card for an event of their choice. In the process, they will work with multi-page layouts and the Print Preview dialog, and import and edit clipart. Suggested topics for discussion include copyright laws that apply to clipart and other graphics, and ways to protect images.

MODULE - IV

Using a template to create a two-page newsletter

Students will learn to work with templates: open an existing template file, modify it and create their own templates. In creating a two-page newsletter, they will also learn how to use text in columns, flow text from column-to-column and page-to-page, wrap text around graphics and create drop caps. Suggested topics for discussion include the history and use of Lorem Ipsum text, possible modern replacements, and the difference between newsletters, blogs and other social media in usage and design.

MODULE - I

The History of Typography A brief timeline of the history of typography and printing. Where did letter forms come from? How have they evolved through time? How does history and technology affect the way letter forms are used and how they look? What is Micro Typography? What is the role of typography within Graphic Design? Type Classifications What are the most commonly used type categories? How can a designer identify what classification a typeface belongs to? The Anatomy of Type What is a serif? What is a serif? What is a stem? stroke? loop? bow1? ball terminal? We will explore the differences between both forms of type and all their idiosyncrasies plus discuss why choosing the right typeface is necessary for good communication.

MODULE - II

Design Exercise Contrast and form studies. Each student will select two letter forms from two different categories and combine them in expressive and contemporary compositions. Design Assignment Typographic specimen poster. Each student will be assigned a typeface and instructed on how to create a specimen poster.

MODULE - III

Old Style Typefaces Brief lecture on "old style" typefaces such as Garamond and Jenson Optical Spacing: Kerning, Tracking, Leading & Point Size What is kerning? What is leading? What is point size? We go over

these details and use InDesign to explore how amounts of space between letters, between lines, the size of letters and position can affect the content of a body of text.

MODULE - IV

Type Pairing To combine or not to combine? What is the limit on the number of typefaces used in a single communication? What is a super family and when is a good time to use it? Design Exercise Five squares and ten inches. Students will experiment with justified blocks of text in varying weights, leading and point sizes to create balanced textural compositions.

Advanced communication skills (including laboratory)

The student must learn **Soft skills and Advanced communication skills (including laboratory**) which can be dealt by course instructor allotted by the department head.

Suggested Input Learnings:

- > Soft skills:
 - JAM
 - Oral Presentation
 - Group Discussion
 - Debate
 - Role Play

Advanced Communication Skills Laboratory:

- Listening Skills
- Note Taking/Note making
 ST02020
- Resume/CVV writing
- PPT slides
- Interview Skills- Mock Interview/ Public speaking

Note:

Marks can be awarded based on internal assessment such as submissions, performance, viva voce etc. Total marks:100

- > 50M Day to day performance, Record, Viva, Attendance &
- ➢ 50M -{soft skills- 25M (Write up 10M, Performance 15M), AELCS- 25M (Write up − 10M, Performance 15M)}

Graphic design basics

To better understand the meaning of graphic design, it is important to be aware of the elements and principles that make up design. Elements are used in conjunction or opposition with each other to create visually striking and impactful designs.

These graphic design elements include:

- Colour
- Form
- Line
- Shape
- Size
- Space
- Texture

MODULE - II

Graphic designers also adhere to the principles of design, which are essentially a set of guidelines that help a design achieve effective composition. These basic principles aid in creating balance and stability for the piece of work.

These graphic design principles include:

- Balance
- Contrast
- Emphasis
- Movement
- Proportion
- Rhythm

MODULE - III

Some of the most notable modern-day graphic design examples stem from advancements in technology. Here's a glimpse of some of these types of graphic design:

- Website design involves creating engaging and intuitive web pages for users. This includes overall layout, color scheme and navigation.
- **Motion graphics design**—or animation—brings visual elements to life through special effects, TV shows, video games and movies.

MODULE - IV

Types of graphic design

- Product design.
- Branding design.
- Website design.
- Print design.
- Publishing design.
- Environmental design.
- Animation design.

| | The | student will be a | | | | | | | | |
| CO1 | To learn about line, balance, line, Hierarchy alignment and how create emphasis and impact with your design | | | | | | | | 1, 3 | 1, 2 |
| CO2 | To understand how to Marketing & advertising graphic design | | | | | | | 2, 3 | 2, 3 | |
| CO3 | They will learnPublication graphic designExamples of marketing graphic design, Postcards and flyers, Magazine and newspaper ads, Posters, banners and billboards | | | | | | | | 1, 2 | 2, 3 |
| CO4 | They learn complete Motion graphic design like: Examples of motion graphic design, Title sequences and end credits, Advertisements, Animated logos. | | | | | | | 1, 2 | 2, 3 | |

Basic Principles of Graphic Design

Alignment: Alignment creates a sharper more unified design

Repetition: Repetition strengthens a design by tying together otherwise separate parts, and as a result, creates associations.

Contrast: Contrast is the most effective way to create emphasis and impact with your design. Hierarchy: Hierarchy creates organization

Balance: Balance provides stability and structure to a design, either through symmetry or tension of elements.

Line: Lines are always more than just points that are strung together. Depending on their form, weight, length and context, lines can help organize information, define shapes, imply movement, and convey emotions.

When it comes to selecting the appropriate lines for projects, designers have plenty of options. Lines can: ...be horizontal, vertical or diagonal.

... be straight, curved or freeform.

...zigzag or create other patterns.

... be solid, broken or implied.

The invisible lines found in the grids of print designs act as guides, offering projects more structure and direction. Meanwhile, visible lines with weight and form can be used to communicate a variety of messages and moods in a designer's finalized work.

MODULE – II

Marketing & advertising graphic design

- Postcards and flyers
- Magazine and newspaper ads
- Posters, banners and billboards
- Infographics
- Brochures (print and digital)
- Vehicle wraps
- Signage and trade show displays
- Email marketing templates
- PowerPoint presentations
- Menus
- Social media ads, banners and graphics
- Banner and retargeting ads
- Images for websites and blogs

MODULE – III

Publication graphic design

Examples of publication graphic design

- Books
- Newspapers
- Newsletters
- Directories
- Annual reports
- Magazines
- Catalogs

MODULE – IV

Motion graphic design

- Title sequences and end credits
- Advertisements
- Animated logos
- Trailers
- Presentations
- Promotional videos
- Tutorial videos
- Websites
- Apps
- Video games
- Banners
- GIFs

MODULE - I

What is Book Design?—There are good reasons to know something about the evolution of the book, the history of typography, and the deep roots that book design.

Book Production and Book Design—Books can be printed and bound in many ways, and understanding practical book production is essential to good book design.

Book construction—Each part of the book has its role to play and its assigned place in the whole.

MODULE - II

Fonts for text—There's no bigger decision a designer makes than selecting the fonts that will be used for the book's text.

- XAG

Fonts for display—Most books use a combination of two typefaces to create a dynamic and readable interior. Knowing how to choose and combine typefaces is critical for the designer.

Architecture of the book page—When a manuscript is turned into a book, there are many elements that have to come into balance on the page. Building pages and spreads is at the heart of book design.

Non-text book elements—Every book incorporates elements that are outside the text itself, like notes, bibliographies, part- and chapter-opening pages, captions, sidebars, pull-quotes, and others. Each has to blend well with the rest of the book, and stand out when necessary.

MODULE - III

Designing simple books—Putting it all into practice, starting with the simplest books; novels, memoirs, essays, and narrative nonfiction.

Designing nonfiction—Adding structure and hierarchy makes the designer's job more challenging, as does adding more book elements and complexity to your projects.

Designing illustrated books—Book design emerges from the background to play a more visible role in the design of art, photography, and other heavily illustrated books.

MODULE - IV

Cover design basics—It's hard to overestimate the importance of an effective book cover in today's crowded market. Your cover has a lot of work to do, and needs to be put together properly.

Cover design for success—Cover design doesn't stop with the basics, that's where it starts. When you

introduce marketing intelligence to your design, you have a winning combination

Designing of recto and verso pages of book.

Designing of pages for poetry and children's books.

Principles of packaging design / Packaging design brief

Group and individual workshop to brainstorm on design inspirations Where do ideas come from? -Table of ideas -Mind map

80

Assign project 1:

Existing packaging redesign (brick carton) Individual research : 2-3 items of brick cartons with different products each

MODULE - II

Packaging design samples on a variety of ideas and presentation techniques

Working on project 1

-Packaging design brief, a refinement of table of ideas or mind map in form of documents

-Variety of thumbnail sketches with instructor support (emphasis on numbers of sketch design

And their varieties)

MODULE - III

Packaging design process

Instruction of workshop: How to form a paper model of a carton

Design development on 3D structure with instructor support

-Form 3D structure of a carton

-Create graphic design on each panel

Discussion and critique on students' works

Individual research : analyses elements of graphic design on different panels of the carton with the product that the student chooses as his or her Project

MODULE – IV

Project 1

Final presentation of project 1

Discussion and critique on students' works

Graphic design on package, the case study on a Corporate Identity (CI) system

Assign project 2: CI for packaging design Group and individual workshop to

brainstorm on design inspirations ; table of ideas or mind map

Individual research : Examples of existing packaging with the students' targeted products

MODULE – V

Folding carton

Workshop 1

Paper folding

Paperboard folding

Packaging folding for project 2

Workshop 2 -Packaging design brief, a refinement of table of ideas or mind map in form of documents -Variety of thumbnail sketches with instructor support (emphasis on numbers of sketch design and their

varieties)

Design positioning & Unique Selling Point (USP)

Design development on 3D structures and graphics of project 2 with instructor support

Discussion and critique on students' works

Final presentation of project 2

Discussion and critique on students' works Product line packaging

Group and individual workshop to brainstorm on design inspirations ; table of ideas or mind map

Individual research : Examples of existing packaging with the students' targeted products

Introduction:

• Community Service Project is an experiential learning strategy that integrates meaningful community service with instruction, participation, learning and community development.

• Community Service Project involves students in community development and service activities and applies the experience to personal and academic development.

• Community Service Project is meant to link the community with the college for mutual benefit. The community will be benefited with the focused contribution of the college students for the village/ local development. The college finds an opportunity to develop social sensibility and responsibility among students and also emerge as a socially responsible institution.

Objective:

Community Service Project should be an integral part of the curriculum, as an alternative to the 2 months of Summer Internships / Apprenticeships / On the Job Training, whenever there is an exigency when students cannot pursue their summer internships.

The specific objectives are;

- To sensitize the students to the living conditions of the people who are around them,
- To help students to realize the stark realities of the society.
- To bring about an attitudinal change in the students and help them to develop societal consciousness, sensibility, responsibility and accountability.

• To make students aware of their inner strength and help them to find new /out of box solutions to the social problems.

• To make students socially responsible citizens who are sensitive to the needs of the disadvantaged sections.

• To help students to initiate developmental activities in the community in coordination with public and government authorities.

• To develop a holistic life perspective among the students by making them study culture, traditions, habits, lifestyles, resource utilization, wastages and its management, social problems, public administration system and the roles and responsibilities of different persons across different social systems.

Implementation of Community Service Project:

- Every student should put in a 6 weeks for the Community Service Project during the summer vacation.
- Each class/section should be assigned with a mentor.
- Specific Departments could concentrate on their major areas of concern.
- A log book has to be maintained by each of the student, where the activities undertaken/involved to be recorded.
- The logbook has to be countersigned by the concerned mentor/faculty incharge.
- Evaluation to be done based on the active participation of the student and grade could be awarded by the mentor/faculty member.
- The final evaluation to be reflected in the grade memo of the student.

• The Community Service Project should be different from the regular programmes of NSS/NCC/Green Corps/Red Ribbon Club, etc.

• Minor project report should be submitted by each student. An internal Viva shall also be conducted by a committee constituted by the principal of the college.

• Award of marks shall be made as per the guidelines of Internship/apprentice/ on the job training.

Procedure

• A group of students or even a single student could be assigned for a particular habitation or village or municipal ward, as far as possible, in the near vicinity of their place of stay, so as to enable them to commute from their residence and return back by evening or so.

- The Community Service Project is a twofold one -
 - First, the student/s could conduct a survey of the habitation, if necessary, in terms of their own domain or subject area. Or it can even be a general survey, incorporating all the different areas. A common survey format could be designed. This should not be viewed as a duplication of work by the Village or Ward volunteers, rather, it could be another primary source of data.
 - Secondly, the student/s could take up a social activity, concerning their domain or subject area. The different areas, could be like –

| Agriculture | Law & Order |
|-----------------------------|--|
| ♣ Health | Excise and Prohibition |
| Marketing and Cooperation | Mines and Geology |
| Animal Husbandry | Energy |
| Horticulture | * Internet |
| * Fisheries | ♣ Free Electri <mark>ci</mark> ty |
| * Sericulture | Drinking Water |
| Revenue and Survey | * Irrigation |
| Natural Disaster Management | |

EXPECTED OUTCOMES

BENEFITS OF COMMUNITY SERVICE PROJECT TO STUDENTS

Learning Outcomes

- Positive impact on students' academic learning
- Improves students' ability to apply what they have learned in "the real world"
- Positive impact on academic outcomes such as demonstrated complexity of understanding, problem analysis, problem-solving, critical thinking, and cognitive development

• Improved ability to understand complexity and ambiguity.

Personal Outcomes

- Greater sense of personal efficacy, personal identity, spiritual growth, and moral development
- Greater interpersonal development, particularly the ability to work well with others, and build leadership and communication skills.

Social Outcomes

- Reduced stereotypes and greater inter-cultural understanding.
- Improved social responsibility and citizenship skills.
- Greater involvement in community service after graduation.

Career Development

- Connections with professionals and community members for learning and career opportunities.
- Greater academic learning, leadership skills, and personal efficacy can lead to greater opportunity.

Relationship with the Institution

- Stronger relationships with faculty.
- Greater satisfaction with college.
- Improved graduation rates.

BENEFITS OF COMMUNITY SERVICE PROJECT TO FACULTY MEMBERS

- Satisfaction with the quality of student learning.
- New avenues for research and publication via new relationships between faculty and community.
- Providing networking opportunities with engaged faculty in other disciplines or institutions.
- A stronger commitment to one's research.

BENEFITS OF COMMUNITY SERVICE PROJECT TO COLLEGES AND UNIVERSITIES

- Improved institutional commitment.
- Improved student retention.
- Enhanced community relations.

BENEFITS OF COMMUNITY SERVICE PROJECT TO COMMUNITY

- Satisfaction with student participation.
- Valuable human resources needed to achieve community goals.
- New energy, enthusiasm and perspectives applied to community work.
- Enhanced community-university relations.

SUGGESTIVE LIST OF PROGRAMMES UNDER COMMUNITY SERVICE PROJECT

The following the recommended list of projects for Engineering students. The lists are not exhaustive and open for additions, deletions and modifications. Colleges are expected to focus on specific local issues for this kind of projects. The students are expected to carry out these projects with involvement, commitment, responsibility and accountability. The mentors of a group of students should take the responsibility of motivating, facilitating, and guiding the students. They have to interact with local leadership and people and appraise the objectives and benefits of this kind of projects. The project reports shall be placed in the college website for reference. Systematic, Factual, methodical and honest reporting shall be ensured. For Engineering Students

| 1. Water facilities and drinking water | 21. Plant diseases |
|--|---|
| availability | ESTD2020 |
| 2. Health and hygiene | 22. Yoga awareness and practice |
| 3. Stress levels and coping mechanisms | 23. Health care awareness programmes and their impact |
| 4. Health intervention programmes | 24. Use of chemicals on fruits and vegetables |
| 5. Horticulture | 25. Organic farming |
| 6. Herbal plants | 26. Crop rotation |
| 7. Botanical survey | 27. Floury culture |
| 8. Zoological survey | 28. Access to safe drinking water |
| 9. Marine products | 29. Geographical survey |
| 10. Aqua culture | 30. Geological survey |
| 11. Inland fisheries | 31. Sericulture |

| 12. Animals and species | 32. Study of species |
|-------------------------------------|---|
| 13. Nutrition | 33. Food adulteration |
| 14. Traditional health care methods | 34. Incidence of Diabetes and other chronic diseases |
| 15. Food habits | 35. Human genetics |
| 16. Air pollution | 36. Blood groups and blood levels |
| 17. Water pollution | 37. Internet Usage in Villages |
| 18. Plantation | 38. Android Phone usage by different people |
| 19. Soil protection | 39. Utilisation of free electricity to farmers and related issues |
| 20. Renewable energy | 40. Gender ration in schooling level- observation. |

Complementing the community service project the students may be involved to take up some awareness campaigns on social issues/special groups. The suggested list of programmes are: Programmes for School Children

ESTD202

- 1. Reading Skill Programme (Reading Competition)
- 2. Preparation of Study Materials for the next class.
- 3. Personality / Leadership Development
- 4. Career Guidance for X class students
- 5. Screening Documentary and other educational films
- 6. Awareness Programme on Good Touch and Bad Touch (Sexual abuse)
- 7. Awareness Programme on Socially relevant themes.

Programmes for Women Empowerment

- 1. Government Guidelines and Policy Guidelines
- 2. Womens' Rights
- 3. Domestic Violence
- 4. Prevention and Control of Cancer
- 5. Promotion of Social Entrepreneurship

General Camps

- 1. General Medical camps
- 2. Eye Camps
- 3. Dental Camps
- 4. Importance of protected drinking water
- 5. ODF awareness camp
- 6. Swatch Bharath
- 7. AIDS awareness camp
- 8. Anti Plastic Awareness
- 9. Programmes on Environment
- 10. Health and Hygiene
- 11. Hand wash programmes
- 12. Commemoration and Celebration of important days.

Programmes for Youth Empowerment

- 1. Leadership
- 2. Anti-alcoholism and Drug addiction
- 3. Anti-tobacco
- 4. Awareness on Competitive Examinations

5. Personality Development

Common Programmes

- 1. Awareness on RTI
- 2. Health intervention programmes
- 3. Yoga
- 4. Tree plantation
- 5. Programmes in consonance with the Govt. Departments

Role of Students:

• Students may not have the expertise to conduct all the programmes on their own. The students then can play a facilitator role.

- For conducting special camps like Health related, they will be coordinating with the Governmental agencies.
- As and when required the College faculty themselves act as Resource Persons.
- Students can work in close association with Non-Governmental Organizations like Lions Club, Rotary Club, etc or with any NGO actively working in that habitation.
- And also with the Governmental Departments. If the programme is rolled out, the District Administration could be roped in for the successful deployment of the programme.
- An in-house training and induction programme could be arranged for the faculty and participating students, to expose them to the methodology of Service Learning.

TIMELINE FOR THE COMMUNITY SERVICE PROJECT ACTIVITY

Duration: 8 weeks

1. Preliminary Survey (One Week)

- A preliminary survey including the socio-economic conditions of the allotted habitation to be conducted.
- A survey form based on the type of habitation to be prepared before visiting the habitation with the help of social sciences faculty. (However, a template could be designed for different habitations, rural/urban.
- The Governmental agencies, like revenue administration, corporation and municipal authorities and village secreteriats could be aligned for the survey.

2. Community Awareness Campaigns (One Week)

• Based on the survey and the specific requirements of the habitation, different awareness campaigns and programmes to be conducted, spread over two weeks of time. The list of activities suggested could be taken into consideration.

3. Community Immersion Programme (Three Weeks)

Along with the Community Awareness Programmes, the student batch can also work with any one of the below listed governmental agencies and work in tandem with them. This community involvement programme will involve the students in exposing themselves to the experiential learning about the community and its dynamics. Programmes could be in consonance with the Govt. Departments.

4. Community Exit Report (One Week)

• During the last week of the Community Service Project, a detailed report of the outcome of the 8 weeks work to be drafted and a copy shall be submitted to the local administration. This report will be a basis for the next batch of students visiting that particular habitation. The same report submitted to the teachermentor will be evaluated by the mentor and suitable marks are awarded for onward submission to the University.

• Throughout the Community Service Project, a daily log-book need to be maintained by the students batch, which should be countersigned by the governmental agency representative and the teacher-mentor, who is required to periodically visit the students and guide them.

MODULE – I Background

Introduction to Copywriting

Basics of Copywriting, Role and Responsibility of Copywriter (Classroom lecture, Group discussions Presentations on some great copywriters and their work)

Role and Importance of copy in an Advertisement, Elements of a Copy-Headline-Types of Headline, Subhead, Body copy- types of Copies, Slogan, , Logo, Company Signature, Mandatories and Legal. (Expert lecture, Group Exercises, Presentations, Observation of Print ads)

MODULE – II

Tha Can Eliments

Writing Persuasive copy- The CAN Elements (connectedness, appropriateness, and novelty), Getting Messages to "Stick": Simplicity, Unexpectedness, Concreteness, Credibility, Emotionality, Storytelling (Classroom Lecture, Group Discussion, Case Studies, Presentations)

Writing copy for various audiences- Children, Youth, Women, Senior citizen and Executives (Classroom Lecture, Group Discussion, Classroom Activities, Observation of Print Ads)

Transcreation vs Translation (Classroom Lecture, Group Discussion, Group Exercises, Presentations)

MODULE – III

Creative Thinking

How to inculcate 'Creative Thinking Attitude'- Left brain thinking, Right brain thinking (Classroom Lecture, Group Discussion, Group Exercises, Presentations) Idea Visualization, Sources of Creative Ideas (Classroom Lecture, Brainstorming Exercises, Presentations)

Creative ways of Thinking-Free association, Divergent thinking, Analogies and Metaphors, Lateral thinking, Brainstorming (Classroom Lecture, Group Exercises, Word-play Exercises, Presentations) Importance and Role of Visuals (Classroom Lecture, Group Exercises, Observation of Print Ads Presentations)

MODULE – IV

Layout Designing

Layout- Importance and Purpose Steps in Designing a Layout-Thumbnail sketches, rough layout, Comprehensive layout and Mechanical (Classroom Lecture, Group Exercises, Observation of Print Ads, Presentations)

Principles and formats of a Layout (Classroom Lecture, Group Exercises, Presentations)

Use of Visuals in different Layouts for Media (Classroom Lecture, Group Exercises, Presentations) Graphics and Illustration-Role and Importance (Classroom Lecture, Group Exercises, Observation of Print

Ads. Presentations)

Psychological and Emotional aspects of colors in Layout Designing (Classroom Lecture, Presentations)

MODULE – V

Creativety

Writing the Creative Brief (Classroom Lecture, Group Exercises, Presentations)
Principles of Effective Copywriting (Classroom Lecture, Group Exercises, Observation of Print Ads, Presentations)
Developing the Big Idea (Classroom Lecture, Group Exercises, Case Studies)
Creating Advertising Appeals: Rational and Emotional (Classroom Lecture, Group Exercises, Presentations)
Major Creative Thinkers in Advertising (Classroom Lecture, Case Studies, Presentations, Screening of Ads)

MODULE – VI

Copy writing for different media

Developing Copy for Print media (Classroom Lecture, Group Exercises) Copy Writing for Radio and Television (Classroom Lecture, Group Exercises, Presentations) Copy Writing for Digital Media (Classroom Lecture, Group Exercises) Copy Writing for Outdoor Media (Classroom Lecture, Group Exercises, Presentations) Designing Sales Literature (Classroom Lecture, Group Exercises, Presentations)

- Teaching content:
- Use the Adobe XD workspace
- Create and import graphics
- Add text and effects
- Create multiple screen layouts
- Designed for mobile
- Use grid repeating elements
- Prototype single interaction
- Prototype design entire website
- Production content scrolling
- Record an interactive video
- Shared prototype
- Export artboards and assets

MODULE - IV

- Build multiple screens of different sizes
- Create graphics and text in Adobe XD
- Import graphics
- Prototyping lists and repeating elements easily with repeating grids
- Add interaction to an element
- Create a transition between screens
- Share and get feedback
- Export art boards and assets

MODULE – IV

- What information do you provide to let a user know what will happen before they perform an action
- Constraints put in place to help prevent errors.
- Do error messages provide a way for the user to correct the problem or explain why the error occurred
- What feedback does a user get once an action is performed
- How long between an action and a product's response time
- Are the interface elements a reasonable size to interact with
- Are edges and corners strategically being used to locate interactive elements like menus
- Is information chunked into a few items at a time
- Are familiar formats used

MODULE – III

What is UI Design? (User Interface Design)

How many types of templates we have?

- What is Command line Interface? Graphical user Interface? Menu driven? Form based?
- Natural language?

The user interface is the graphical layout of an application. UI consists of the buttons users click on, the images, videos, texts, and overall interaction & the behavior of the application. The main goal of the UI designers is to create a user interface that is engaging, attractive and beautiful

MODULE – IV

Portfolio Building

we'll explore the 8 most important UI/UX design skills you should showcase in your portfolio and how. Let's get straight into it.

T0007

- User Research
- Wireframing
- Prototyping
- Information Architecture
- Visual Design
- UX Writing
- Interaction Design
- Mobile Design

MODULE - I

Introduction to the Campaign design and about experience of the design we will see. In this part product campaign design will come.

- Social Media Ads
- Print ads
- Direct mail ads
- Preparing the Point of sale
- Google & search ads
- Video ads
- The Advantages of a POS System
- Your business can enjoy the following benefits by adopting a POS system:
- Improved accuracy

• Cashier mistakes can easily cost a retail business as much as one-third of their profits per year. With a POS system, you can eliminate the need to manually key in items and prices. It significantly reduces the risk of human error and provides far more accuracy than a basic cash register.

• Simple reporting

• Reporting can be a daunting task for your business. A POS system can simplify it through reports which provide useful data in real-time. You can use this data to make informed decisions that steer you toward success.

• Inventory management

MODULE - II

- Preparing the Poster design and Magazine design
- Identify the goal of your poster.
- Consider your target audience.
- Decide where you want to share your poster.

- Select a pre-made poster template.
- Pick a relevant or branded color scheme.
- Include a clear call to action.
- Use varied fonts to create visual hierarchy.

MODULE - III

- Preparing the Brochure Design, Flyers designs
- Define the target audience for your marketing brochure
- Create thoughtful, targeted messaging for your marketing brochure
- Collect unique, meaningful images or illustrations for your marketing brochure
- Design the brochure around your copy, images, and branding
- Repurpose the same brochure design for different products
- Remember your brand design standards
- Design with the reader in mind
- Choose your brochure type
- Gather your copy and images
- Find your style

MODULE - IV

How to campaign your Products?

Are you working to position your fundraising campaign for success? If so, make sure that you are employing the five essential campaign marketing principles:

1. Design for people.

- 2. Focus on volunteers.
- 3. Plan for responses..
- 4. Keep it simple.
- 5. Aim outside.

MODULE -I(CO1)

Introduction to Adobe Premier Pro and Basics- Workspace, Importing and organizing the media, Sequence.

Video Editing Terminologies & Definitions: 4K, 8K, HD Resolution, Alpha Channel / Layer, Aspect Ratio,. B-roll and A-Roll, Chrome Keying, Color Correction vs Color Grading, Codecs, Composting, Key Frames, Render etc.

MODULE-II(CO1)

Video Editing Basics: Understanding the Time line, Creating a Sequence, Editing Tools, Video Properties: Scale, Position, Rotation, Opacity etc., Types of cuts(J-Cut, L-cut), Mask Concepts, Blend Modes.

Video Transitions: Cross Dissolve, Iris, Push, Barn doors, flip over, 3d cubes etc.,

MODULE-III(CO2)

Video Effects: Track Mattes, Directional Blur, Wrap Stabilizer, Mosaic, 4-Color Gradientetc., Audio Editing Basics: Understanding the audio Properties, Adjusting audio Levels, Removing background Noise, Track Mixer.

MODULE -IV(CO3)

Titles & Graphics: Understanding Essential Graphics Panel, Adding Motion to Graphics, Responsive Design, Speech to Text Feature.

Color Correction and Color Grading : Introduction, Adjusting White Balance, Exposure, Saturation

with lumetri Color.

MODULE -V(CO3)

Video Speed: Time Remapping, Freeze Frame and Frame Hold, Bezier Path, Ease In, Ease Out, Reverse Video.

Green Screen / Chromakeying: Understanding Greenscreen concepts, Removing background and making better appearance.

MODULE -VI(CO4)

Advanced Concepts in Color Grading, Premier Pro Skills, Mini Project Work.

MODULE – I

The basic composition of the Adobe XD interface

ESTD2020

- XD introductory course: layout and design; creation and preview; sharing and review; using UI kits
- Project Setup Course: Launch XD Projects; Add and Edit Artboards; Use Grid to Set Columns and

Margins; Align Content with Grids; Use UI Toolkits; Create Scrollable Artboards

• XD & PS Tutorial: PS User XD Quick Start; Designing Landing Pages with XD and PS; Designing

Mobile Apps with XD and PS.

MODULE-II

- Learning Adobe XD:
- Browse the XD interface
- Use artboards and grids

- Add content to the layer
- Use the repeat grid feature
- Add interactivity to your project
- Export content
- Share your work

MODULE – III

Designing websites with Adobe XD

- Teaching content:
- Use the Adobe XD workspace
- Create and import graphics
- Add text and effects
- Create multiple screen layouts
- Designed for mobile
- Use grid repeating elements
- Prototype single interaction
- Prototype design entire website
- Production content scrolling
- Record an interactive video
- Shared prototype
- Export artboards and assets

MODULE – IV

- Build multiple screens of different sizes
- Create graphics and text in Adobe XD
- Import graphics
- Prototyping lists and repeating elements easily with repeating grids
- Add interaction to an element
- Create a transition between screens
- Share and get feedback
- Export art boards and assets

MODULE - I

Everything stems from knowing your users, including understanding their goals, skills, preferences, and

tendencies. Once you know about your user, make sure to consider the following when designing your

interface:

MODULE - II

Keep the interface simple. The best interfaces are almost invisible to the user. They avoid unnecessary elements and are clear in the language they use on labels and in messaging.

Create consistency and use common UI elements. By using common elements in your UI, users feel more comfortable and are able to get things done more quickly. It is also important to create patterns in language, layout and design throughout the site to help facilitate efficiency. Once a user learns how to do something, they should be able to transfer that skill to other parts of the site.

MODULE - III

Be purposeful in page layout. Consider the spatial relationships between items on the page and structure the page based on importance. Careful placement of items can help draw attention to the most important pieces of information and can aid scanning and readability.

Strategically use color and texture. You can direct attention toward or redirect attention away from items using color, light, contrast, and texture to your advantage.

Use typography to create hierarchy and clarity. Carefully consider how you use typeface. Different sizes, fonts, and arrangement of the text to help increase scanability, legibility and readability.

MODULE - IV

Make sure that the system communicates what's happening. Always inform your users of location, actions, changes in state, or errors. The use of various UI elements to communicate status and, if necessary, next steps can reduce frustration for your user.

Think about the defaults. By carefully thinking about and anticipating the goals people bring to your site, you can create defaults that reduce the burden on the user. This becomes particularly important when it comes to form design where you might have an opportunity to have some fields pre-chosen or filled out.
